

## 1. Brief introduction \_\_/3

Boss fight encounters. Boss fights will occur at the end of levels; they prevent the player from proceeding to the next level until complete. Every boss fight will be unique. Bosses will be visually unique, and will feature unique mechanics that are more complex than those of regular enemies. The unique mechanics of the boss will be implemented as special abilities, which have a cooldown, similar to swinging a weapon.

## 2. Use case diagram with scenario \_\_14

### Use Case Diagrams

## Scenarios

Example outline:

**Name:** Use special ability.

**Summary:** The enemy AI uses one of the boss's special abilities.

**Actors:** Enemy AI.

**Preconditions:** Boss fight encounter is active.

**Basic sequence:**

**Step 1:** Enemy AI determines it is a good time to use the boss's ability.

**Step 2:** Special ability is used.

**Step 3:** Special ability's defined effect occurs.

**Step 4:** Start cooldown of ability

**Exceptions:**

**Step 2:** Special ability is still on cooldown: Reset sequence.

**Post conditions:** None

**Priority:** 1\*

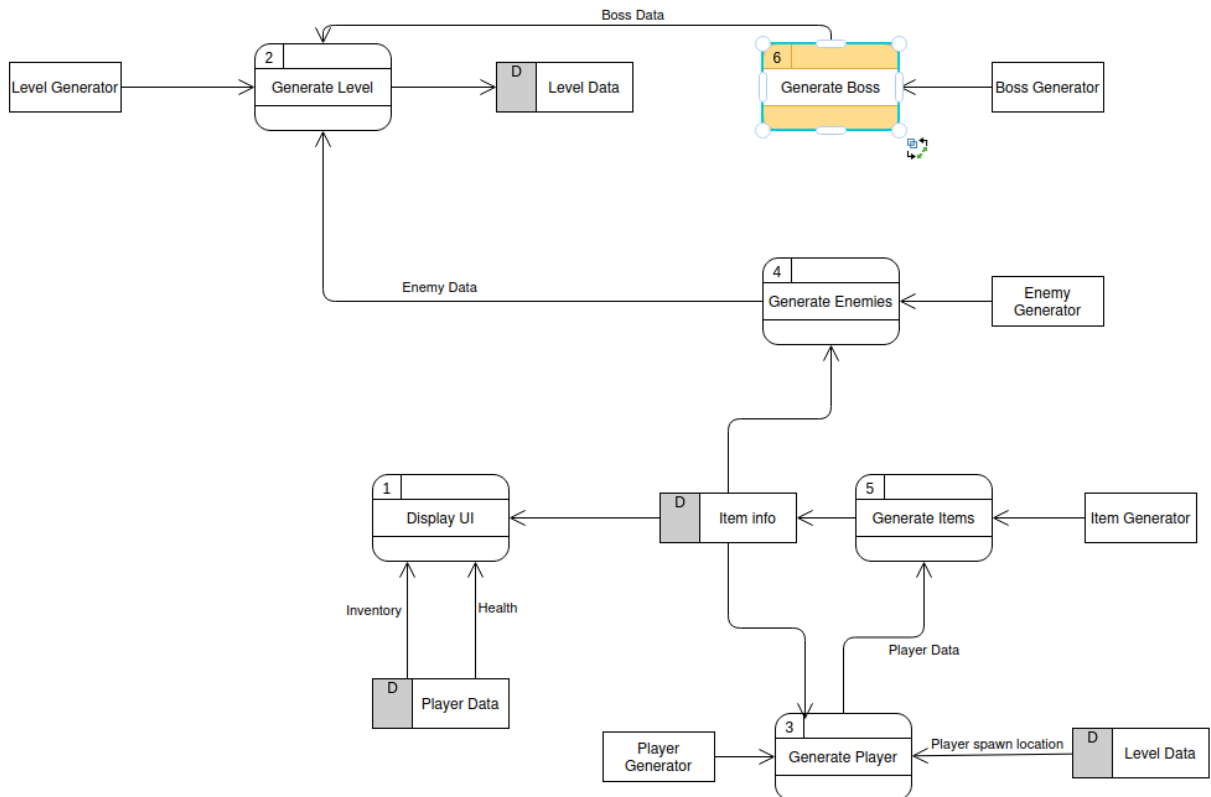

**ID:** JG1.

\*The priorities are 1 = must have, 2 = essential, 3 = nice to have.

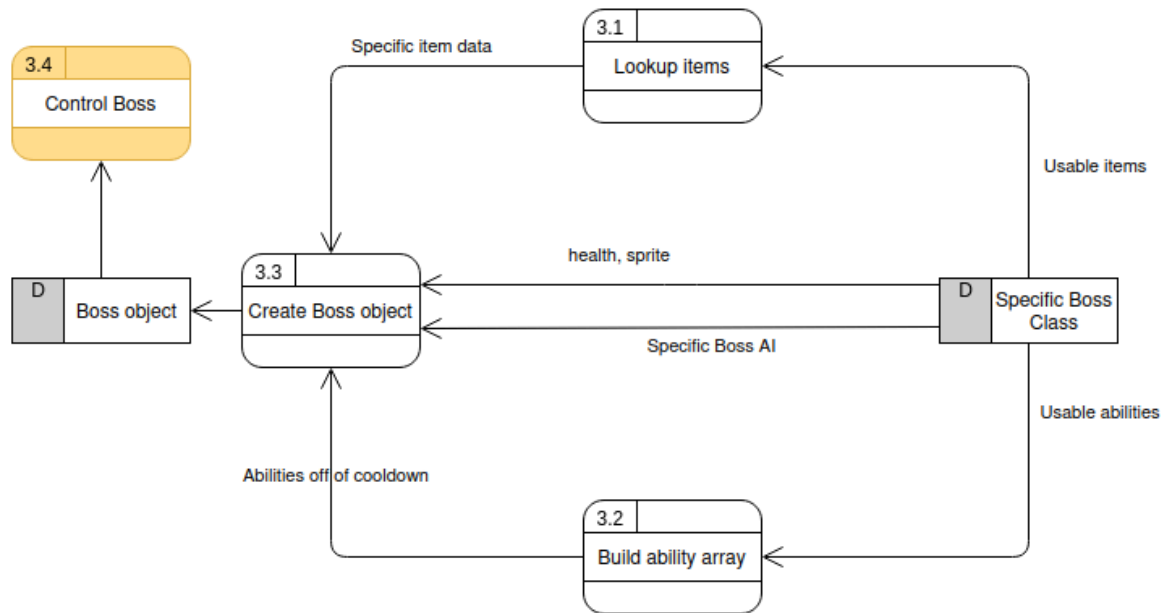

### 3. Data Flow diagram(s) from Level 0 to process description for your feature \_\_\_\_\_14

#### Data Flow Diagrams

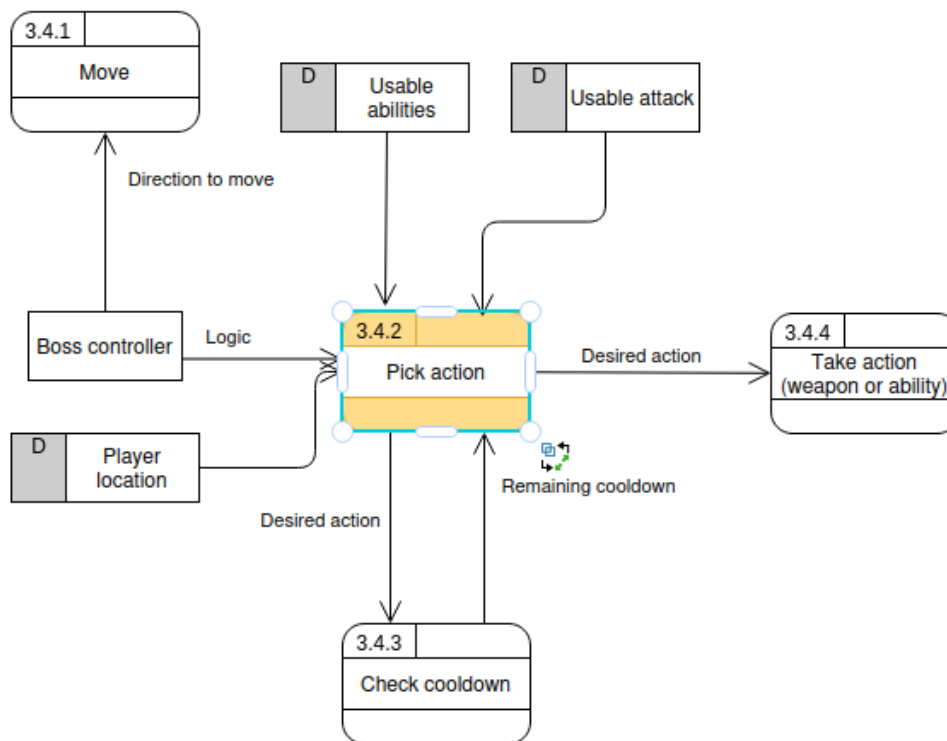

Level 0

## Level 1

## Level 2

## Process Descriptions

Pick action:

- bool weaponUsed = false

- bool abilityUsed = false

- if player is within range of weapon:

  - if checkCooldown(weapon) <= 0:

    - use weapon

    - start cooldown of weapon

    - weaponUsed = true

- if not weaponUsed:

  - for ability in usable abilities:

    - if checkCooldown(ability) <= 0:

      - use ability

      - start cooldown of ability

      - abilityUsed = true

      - break

- if not weaponUsed and not abilityUsed:

  - do nothing

## 4. Acceptance Tests \_\_\_\_\_9

### Use Boss Ability:

- Pick first ability and use it

- Start timer

- Repeatedly attempt to reuse ability

- Stop timer when ability is able to be reused

- Check that timer is within 100ms of defined cooldown length of ability.

- Repeat for all remaining abilities

### Use Attack

- Pick faux player location at random

- Use weapon in the direction of the player location

- Check if weapon swing hit the location

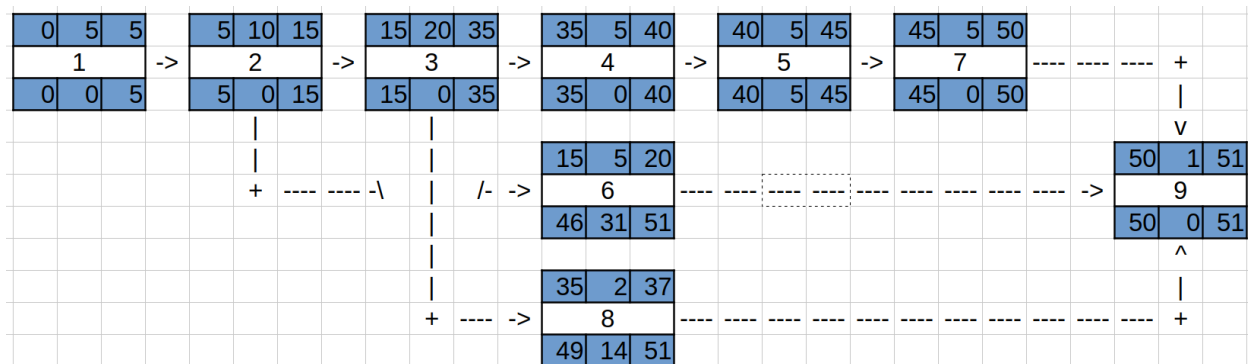

Should only hit the location if the distance is less than or equal to the defined range of the weapon. Repeat a number of times.

## 5. Timeline \_\_\_\_\_/10

### Work items

Task	Duration (hours)	Predecessor Task(s)
1. Requirements gathering	5	-
2. Design bosses	10	1
3. Implement bosses	20	2
4. Test function of encounters	5	3
5. Rebalance boss encounters	5	4
6. Acquire art for bosses	5	2
7. Final play test and rebalance	5	5
8. Documentation	2	3
9. Installation	1	6,7,8
